

# Environmental and energy policy of Laukötter GmbH

With this environmental and energy policy, Laukötter GmbH is committed to sustainably and continuously reducing energy and resource consumption, especially in the main and ancillary smelting plants, as well as the associated CO<sub>2</sub> emissions (decarbonization). In addition, we are committed to protecting the environment and complying with binding obligations, compliance with the applicable legal requirements and the laws and regulations that apply to us.

This is done on the basis of the environmental and energy goals set by top management. The basis for the definition of goals is the consumption and production data from the past as well as the economic efficiency of the measures.

The implementation of the environmental and energy policy is carried out through the implementation of a complete management system in which:

- energy consumption is constantly measured and monitored.
- key energy aspects are regularly recorded, reviewed and communicated.
- Processes and activities are permanently reviewed, evaluated and continuously improved for their energy efficiency.
- the energy flows are recorded and kept up to date.
- energy-saving measures are planned and implemented to reduce greenhouse gas emissions.
- sustainable use of resources, as well as measures to reduce waste, avoid waste, reuse and recycle.
- the procurement and design of energy-efficient systems and services is supported.
- responsible handling of chemicals (hazardous substances) is ensured.
- the management of natural resources to protect water, soil quality, plants and geology.
- the results of environmental and energy-saving measures are recorded, analysed and evaluated at regular intervals.
- The necessary resources and information are made available by the management to achieve the environmental and energy goals.
- the further expansion of renewable energies on the Laukötter company premises is being sought.
- the further development of the integrated management system in accordance with the ISO50001/ISO14001 is focused.
- the reduction of noise emissions is ensured by appropriate measures

The implementation of the environmental and energy policy requires the cooperation of all employees and service providers. Employees are comprehensively informed and involved in the environmental and energy management system. The company's environmental and energy policy applies equally to all areas of the company, all activities and processes to ensure the continuous improvement of energy and environmental performance.

Wadersloh, 26.08.2025  
Laukötter GmbH  
Management  
Mr. Michael Laukötter
